Introduction

Dalam era digital saat ini industri perfilman telah mengalami perkembangan pesat yang didorong oleh kemajuan teknologi informasi. Layanan streaming seperti Netflix dan Disney+ menjadi salah satu pilihan dalam menonton film. Hal ini menjadi masalah bagi pengguna untuk menemukan film yang sesuai dengan preferensi mereka.

Di Perlukan Sistem Rekomendasi

Kesimpulan

Term Frequency

all	can	day	do	feel	fun	hate	learn	...
0	0	0	0	0	2	0	1	
1	1	1	1	0	0	0	0	
0	0	0	0	1	0	1	0	

Term Frequency adalah metode yang digunakan untuk mengubah kata menjadi angka dengan menghitung frequency kemunculan kata pada setiap document

Movie_recommendation_system.ipynb

```
1 from sklearn.feature_extraction.text import CountVectorizer  
2  
3 tf =CountVectorizer()  
4 tf_matrix = tf.fit_transform(df['listed_in'])  
5 tf_matrix.shape
```

Snipped

Cosine Similarity

Terminator 2

Ant Man
GOTG Vol 2

0,1

1,1

Action

0,0

1,0

45
deg.

Comedy

Melakukan pengukuran kemiripan/similarity berdasarkan kata yang telah dilakukan term frequency

Movie_recommendation_system.ipynb

```
1 from sklearn.metrics.pairwise import linear_kernel  
2  
3 similarity = linear_kernel(tf_matrix, tf_matrix)
```

Snipped

Recommendation Class

Movie_recomendation_system.ipynb

```
1 def recommendations(title, similarity=similarity):
2     # Get the index of the movie that matches the title
3     try:
4         idx = df[df['title'] == title].index[0]
5         # mendapatkan similarity
6         sim_score = list(enumerate(similarity[idx]))
7
8         # mengurutkan film berdasarkan similarity
9         sim_score = sorted(sim_score, key=lambda x: x[1], reverse=True)
10
11         # mendapatkan 5 film yang memiliki similarity
12         sim_score = sim_score[1:6]
13
14         # mendapatkan index dari movie
15         index_movie = [i[0] for i in sim_score]
16
17         # mengembalikan 5 film yang memiliki similarity
18         return df.iloc[index_movie][['title', 'type', 'country','listed_in']]
19
20     except IndexError:
21         print(f"Title '{title}' not found in the dataset.")
22         return []
```

Snipped

Membuat Class/fungsi untuk melakukan rekomendasi dengan berdasarkan similarity score

Output

```
recommendations('Dick Johnson Is Dead')
```

		title	type	country	listed_in
16	Europe's Most Dangerous Man: Otto Skorzeny in ...		Movie	NaN	Documentaries, International Movies
45		My Heroes Were Cowboys	Movie	NaN	Documentaries
68		Schumacher	Movie	NaN	Documentaries, International Movies, Sports Mo...
88	Blood Brothers: Malcolm X & Muhammad Ali		Movie	NaN	Documentaries, Sports Movies
91		The Women and the Murderer	Movie	France	Documentaries, International Movies

Sistem memberikan 5 recomendasi film berdasarkan similarity dari genre film
